Get to know Lauren Duran

Areas of interest, research and professional involvement: I am interested in hematology and oncology, palliative care, pain management, opioid stewardship, parenteral nutrition support, medication safety and quality improvement.

Research: Quality improvement initiatives, novel pain management therapies in pediatrics and standardization initiatives in the oncology setting.

Professional involvement: Dallas-Fort Worth Chapter of ACCP (member/officer), Hematology-Oncology Pharmacist Association and Children's Oncology Group.

More about me: Originally from Houston, Texas, I moved to west Texas to attend college at Texas Tech University. Through undergraduate, graduate and pharmacy school I had the opportunity to provide health care services to the population of west Texas and the Texas panhandle. I was given the opportunity to work with a pediatric oncology pharmacist and physician in an outpatient clinic and infusion center, and I fell in love! Through my residency training, I found a new passion in pain management and palliative care. I enjoy working with a comprehensive medical team to provide optimal and novel care to the patients in these settings.

My husband, Robbie, and I have been married since 2012 and are the proud parents of a German shepherd named Maggie. We enjoy hiking, watching movies, playing board games and hosting game nights with friends and family. We have lived all over Texas, and we may never leave. We love to travel, and we are excited to explore the world together!
