

## ***Stitch-A-Wish***

benefiting **Cook Children's Medical Center** in Fort Worth, Texas

### **TELEMETRY BIBS**

Opened Up

Back with Pocket

Front

Telemetry Bibs allow toddlers mobility even while attached to heart monitoring equipment. A Telemetry Bib is basically a smock with a **BUTTON** closure on the shoulders, and a pocket on the back. The pocket is used to hold portable heart monitoring equipment so that a toddler can still get up and move around. The pocket also keeps the monitoring equipment out-of-sight of the toddler.

#### **Supplies:**

Toddler's smock pattern.

#### **Directions:**

It is preferred that the shoulders be easily opened and closed using a **BUTTON**.

The pocket on the back should measure approximately 6" wide by 7" tall.

***Thank you!!***
