

FREE sports EKGs with physician referrals

Cook Children's provides sports EKGs to identify children, over the age of 11, at risk for sudden cardiac arrest.

Adding this test will enhance detection of some conditions that may lead to sudden cardiac arrest.

Sports EKGs are for patients with no family history of sudden cardiac arrest, no symptoms and a normal physical exam.

Cook Children's Arlington and Fort Worth locations will offer FREE sports EKGs during the following months:

- February
- May
- August
- October
